ABOUT ASUS

ASUS, the world's top 3 consumer notebook vendor and the maker of the world's bestselling and most award winning motherboards, is a leading enterprise in the new digital era.

ASUS designs and manufactures products that perfectly meet the needs of today's digital home, office and person, with a broad portfolio that includes motherboards, graphic cards, displays, desktop PCs, notebooks, servers, multimedia, wireless solutions, networking devices and mobile phones.

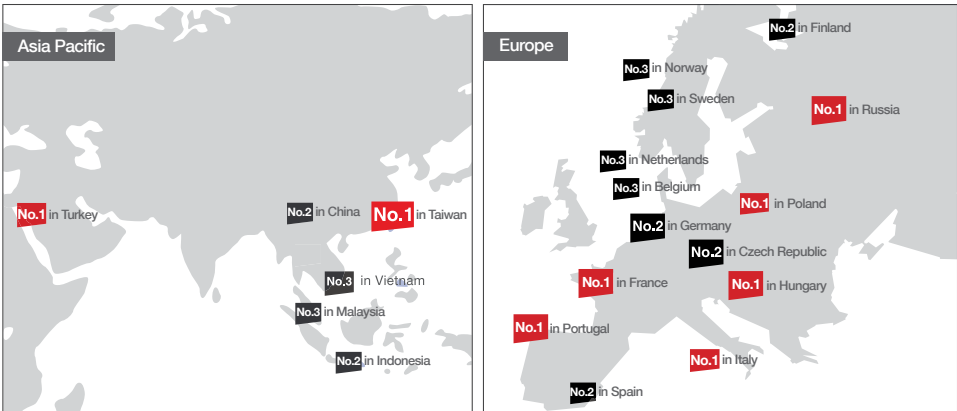

Driven by innovation and committed to quality, ASUS won 3,886 awards in 2011 and is widely credited with revolutionizing the PC industry with the Eee PC™. With a global staff of more than 11,000 people and a world-class R&D team of 3,100 engineers, 900+ support centres worldwide, the company's revenue for 2011 was around US\$11 billion.

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- Top 1 notebook brand in Central and Eastern Europe
- Top 2 notebook brand in South East Asia
- Top 2 notebook brand in China
- Top 3 notebook brand in Western Europe

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

ASUS received 3,886 awards in 2011

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

## ASUS - A Top 2 Notebook Brand in South East Asia

Due to consumer trust in ASUS quality and innovative designs, the company has become one of the regional top two notebook brands based on 2011 whole-year performance.

ASUS celebrates another year of business excellence in 2011. Achieving a 145% growth rate last year, ASUS is the only PC brand to display strong expansion for 12 consecutive quarters, despite prominent seasonal factors and a tough global macro-economic landscape with deep impact on Southeast Asia markets and consumption.

VENDOR	RANK
ACER	1
ASUS	2
HP	3
Toshiba	4
Dell	5
Lenovo	6

Commenting on this, Rex Lee, Regional Director of Southeast Asia for ASUS said:

“New ideas and technologies pave the way for success”

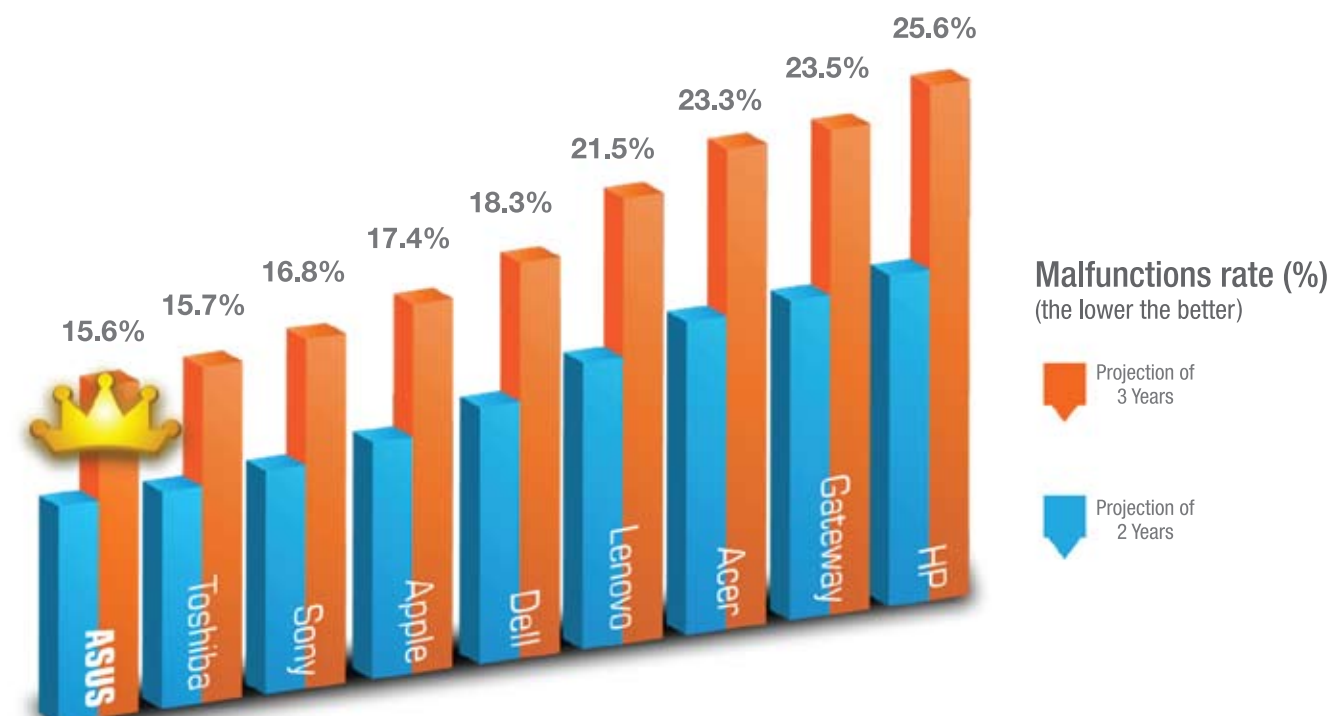

“ASUS greatly appreciates the recognition we and our products receive from consumers, and would like to thank all channel partners for their great support. We will continue to provide the best quality products through consistent innovation and persistent perfection.”

## Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (page 6).

Source: [www.squaretrade.com/pages/laptop-reliability-1109/](http://www.squaretrade.com/pages/laptop-reliability-1109/)  
Square Trade, 2009/Nov/16th, Report "1 in 3 laptops fail over 3 years"

### SquareTrade Report Disclaimer

- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data
- We did not take into consideration purchase locations
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied about the data accuracy of the data

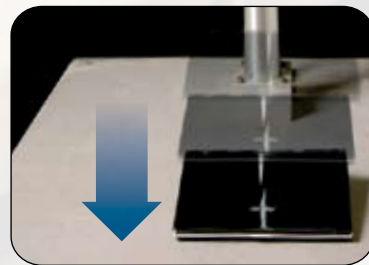

# Extreme Test Ensure Top-Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

## Twist Testing

Notebooks are twisted and pressed upon to verify their strength and endurance. As such, they are stronger than average and can take greater pressures without cracking or suffering indentations. This is especially important for travellers who pack their notebooks in suitcases and backpacks.

## Shock Testing

Notebooks are likely to experience shocks during shipping and day-to-day use. So ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

## Enhanced Drop Testing

A dropped notebook shouldn't mean a broken notebook and ASUS puts its models through a series of drop tests that measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

## Vibration Testing

Vibration testing subjects notebooks to a range of frequencies to ensure that both outer construction and internal components are firmly secured and up to the task.

## Altitude Testing

The purpose of the altitude test is to determine the effects of reduced pressure on products. Damaging effects can be caused by leakage of gases or fluids from sealed containers, dry-out of lubricants from mechanical assemblies, ruptured pressured containers arc-over of high voltage supplies, and reduced efficiency of cooling. ASUS notebooks have thus even proven themselves in the harsh environment of low Earth orbit on the Mir space station.

## Temperature and Humidity Testing

Notebooks go through trials that verify their ability to operate optimally in diverse climates and environmental conditions. Both very low and very high humidity ranges are part of the tests, including temperature extremes. Potential weak spots in material or engineering are noted and corrected to guarantee high durability and flexibility.

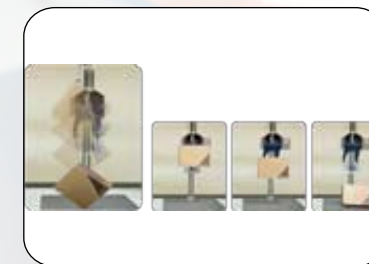

## Enhanced Hinge Testing

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

## Enhanced Pressure Testing

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

## Transportation Testing

All notebooks are tested along with their dedicated packing materials to stimulate real-life situations and shipping conditions. This ensures that they arrive at their destinations in their prime conditions and ready to meet the needs of the consumers.

## Acoustic Noise Testing

ASUS notebooks undergo meticulous noise testing to help promote a quiet and pleasant computing environment for consumers. Noise mitigation, quiet cooling and component seals are all put to test in this set of trials.

# Marks in History

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

## In outer space

**ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.**

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

## In the air

**ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.**

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

## On the road

**ASUS Notebooks Perform Flawlessly During a Gruelling Off-road Race.**

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

## At the ends of the earth

**ASUS Notebooks Conquer the North and South Poles.**

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

## On the world's highest peak

**ASUS Notebooks Are The First to Reach The Top of Mount Everest**

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

# ASUS won 3,886 awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

**ASUS Eee PC 1015PEM**

# ASUS LAPTOP FEATURES DESIGNED WITH YOU IN MIND

## ASUS Instant On

### Powered by SHE II Technology

Super Hybrid Engine II incorporates elements of its SHE predecessor and builds on the vitals of better battery performance. Instant On allows notebooks to resume in under 2 seconds\* and stay in standby for up to 15 days\*. Importantly, should battery levels fall below 5%, data is automatically saved and secured on the hard drive\*.

\*Resuming from hibernation on a mainstream notebook can typically take 30-60s. Normal standby time before battery drains on mainstream notebooks is 3-5 days.

## SonicMaster Technology

### Audio by Bang & Olufsen ICEpower®

Brand new ASUS notebooks cater to audiophiles desiring superior sounds. ASUS has done this by fusing advanced hardware and software in a pioneering approach to mobile audio.

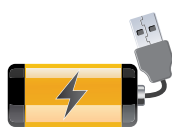

## Video Magic

## Video Magic Technology

### Experience vivid visuals with ASUS Video Magic

ASUS Video Magic is a complete hardware and software video solution. The GPU processes data at a much faster rate, enabling it to handle most graphics intensive tasks with relative ease. True Theater software upscales DVD-quality video to Full HD. ASUS Splendid technology optimizes media files, reducing noise and improving conversion rates for sharper, more vivid images with better contrast, brightness, skin tones and color saturation across all video applications.

## ASUS USB Charger+

### Quick charge even when powered off

Recharge faster no matter what mode your notebook is in and regardless of connection to wall sockets. USB Charger+ works all the time right from the battery!

### Reduce charging times by half

USB Charger+ recharges your devices twice faster than a normal USB port.

## 30 Days Bright Dot Return

### One month servicing/return

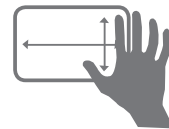

ASUS stands by their notebook LCD panels, offering a one month servicing/replacement of the panel from time of purchase should the panel have any bright-dot.

## ASUS USB 3.0

### Super fast transmission speeds

ASUS notebooks are the first to feature USB 3.0. It delivers transfer speeds of up to 5Gbps, or up to 10 times that of current USB2.0 standards. This allows for faster transfers of large files like HD movies. Devices even recharge faster with 900mA charging; while USB 3.0 incorporates some environmentally-friendly features that save energy – it puts devices in idle or shuts them down when not in use.

## Intuitive Multi-Touch Touchpad

The multi-touch touchpad allows you to easily scroll through web pages and pinch-zoom in and out of images.

## ASUS AI Recovery Burner

### Never forget to burn your recovery discs

There's no doubt that recovery DVDs are an essential asset, should things go wrong, as they can restore the entire system, including drivers and utilities to its original factory fresh state. However, most users forget to make them until it's too late, so ASUS has taken its AI Recovery Burner software to gently remind people that they need to pop a disc in. If that disc is lost or damaged, then a new one can be created at any time, with ASUS simple one click interface.

# ASUS PRODUCT RANGE

## ASUS ULTRAPORTABLE SERIES

The perfect travel companions for business users on the move. Exclusive design touches add a stylish personal touch, while cutting-edge technology ensures the best performance and battery life.

ASUS ZENBOOK™  
11.6" / 13.3"

## ASUS MULTIMEDIA SERIES

Crystal-clear screens, fast processors and powerful graphics deliver outstanding multimedia performance, whether you're creating digital content or just enjoying it.

ASUS N46

# What's new in

## Top 6 Hotmail Tips

### Hotmail Tip 1

#### Sweep unwanted mail out

Windows Live Hotmail helps you get rid of unwanted email with the Sweep menu.

#### Step 1 : Spot a sender whose message you want to sweep out

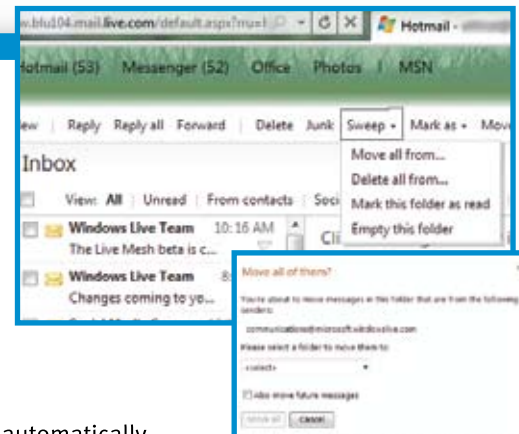

Select the check box next to message from that sender.

#### Step 2 : Click Sweep

You can choose to move or delete all the messages from the sender.

#### Step 3 : Don't bother with this again

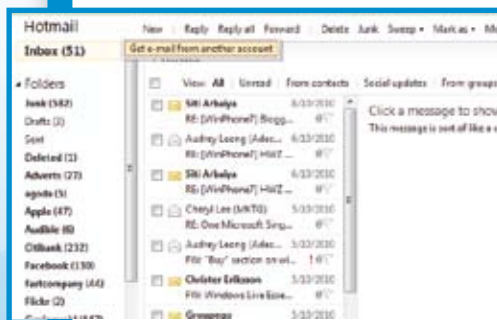

Just select the box to move or delete future messages from the sender automatically.

### Hotmail Tip 2

#### View and filter your messages quickly

With one click, you can view and filter your messages by popular categories.

#### Quick View :

Click a category under Quick views to see all the messages that match it. For example, click Photos to see all the messages that have photos attached.

#### Filters :

Click one of the filter categories that appear above the message list to see all the messages that match it. For example, click Unread to see all the messages that you haven't read yet.

### Hotmail Tip 3

#### Manage your email

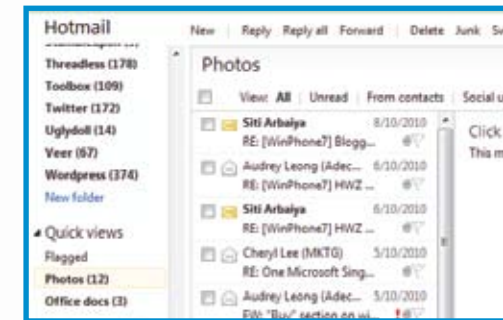

Set up Windows Live Hotmail to access multiple email accounts, like Gmail, AOL Mail, and Yahoo! Mail. Then, you can send and receive email from all of these accounts right in Hotmail—and get more done in less time.

#### Step 1 : Add an email account

In the left pane, next to inbox, click the Tools icon, and then click Get email from another account.

#### Step 2 : Enter your account info

Click Add an email account, type the email address and password for the account you want to add, and then follow the instructions on your screen.

#### Step 3 : Set folders and icons

Select the folder where you'd like email from this account to go. You can also choose a colored icon to indicate mail from that account. When you're done, click Save.

**\* Note :** If you have multiple Hotmail accounts, you can link your Windows Live IDs to easily switch between accounts without signing in again. Just sign in to your account and under Other options click Linked IDs and follow the on-screen instructions.

### Hotmail Tip 4

#### View photos and videos in your inbox

By using Active View in Windows LiveHotmail, you can view photos and videos you receive right in your inbox, without leaving Hotmail.

#### Viewing Photos :

When someone sends you photos or a link to a photo album, you see thumbnail images of the photos, and you can even view a slide show right in the message.

#### Viewing Videos :

When you receive a link to an online video, you can click the video to play it in the message.

### Hotmail Tip 5

#### Chat from your inbox

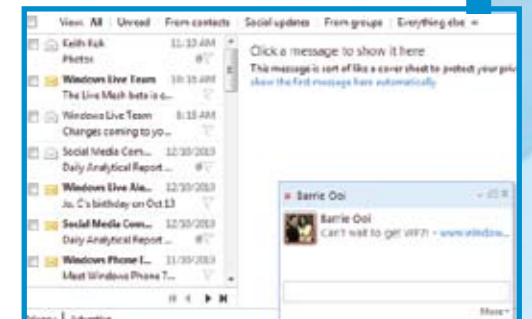

Now you can chat with your Windows Live Messenger contacts without even leaving your inbox in Windows Live Hotmail. See who's online and have instant conversations all in one place.

#### Step 1 : See Who's online

In the left pane of your inbox, under Messenger, type a name in the Search contacts box to find a contact and see his or her status.

#### Step 2 : Start to chat

Point at a contact to see a list of messaging options—or just click the contact to open a Messenger window and send an instant message.

### Hotmail Tip 6

#### Send photo

Share your photos on Windows Live SkyDrive by simply sending an email message from Windows Live Hotmail. Your friends and family will be able to view slide shows of your photos and download them from SkyDrive without filling up their inboxes with large photo attachments.

#### To share photos on SkyDrive :

When someone sends you photos or a link to a photo album, you see thumbnail images of the photos, and you can even view a slide show right in the message.

1. Click New to create new message.
2. Type an email address and subject.
3. Click Photos, and then click Create album on SkyDrive.
4. Select the photos that you want to create an album with, and then click Open. Hotmail will upload and save the photos to SkyDrive.
5. Type a message, and then click Send.

**\* Note :** You need to install Microsoft Silverlight to use this feature. This feature is not yet available in all countries or regions.

# ASUS ZENBOOK™

Do you believe in love at first sight?

T3 ★★★★★

This is perhaps the best Windows Ultrabook available today, and by golly it costs almost \$200 less than the Macbook Air.  
- T3, 2012 Feb.

Buy a Windows 7 PC and get Windows 8 Pro for \$17.99.  
Offer valid June 2, 2012 through January 31, 2013, for complete details visit <http://windowsupgradeoffer.com>

**Up to i7 processor**  
ASUS ZENBOOK™ is powered by Intel® Core™ i7 processor that intelligently and automatically accelerates performance.

# ASUS N Series

## HEAR THE INCREDIBLE, FEEL THE POWER

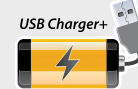

Audio by Bang & Olufsen ICEpower®

ASUS recommends Windows® 7.

**2 seconds Instant On**  
Always instant on in 2 seconds  
with up to 2 weeks standby time

**USB Charger+**  
**Quick charge, even when powered off**  
Exclusive Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off.

**USB 3.0**  
Transfers data and HD multimedia content up to 10X faster than USB 2.0 for speedier file sharing and data backups

**ASUS SonicMaster Technology**  
Incredible audio performance co-developed with Bang & Olufsen ICEpower® with lifelike surround impact

### MaxxAudio 3

**MaxxAudio 3**  
Harnessing the power of the same tools heard on countless hit records and major motion pictures, now you can enjoy louder, clearer, fuller, and more intelligible sounds with your laptop.

**Clear and fluid video recording**  
The integrated HD camera is designed to provide crisp, clear and fluid video recording for video calls and conferencing or home movie creation, even in low-light situations

With better audio, sparkling full HD video, premium computing power and a redesigned input interface, get ready to have your senses stimulated with the new N series notebooks.

## Defining Entertainment

ASUS SonicMaster audio, co-developed with Bang & Olufsen ICEpower® delivers crisp highs to full mids which are perfectly balanced with the pounding bass from the bundles external ASUS subwoofer, giving you an audio experience you wouldn't expect from a notebook.

With the latest in LED panel technology that delivers clearer and brighter images, N series notebooks deliver pristine Full HD videos better than ever.

Experience entertainment as it was meant to be.

# ASUS Transformer Pad Infinity

## Transform to Full HD. Infinite Entertainment Awaits.

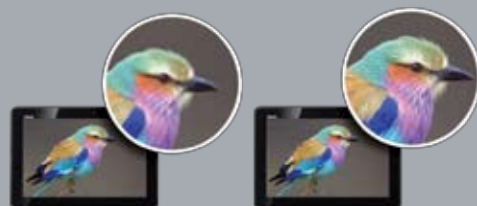

ICE CREAM SANDWICH

The ASUS Transformer Pad Infinity Series is made specially with the needs of Multimedia Enthusiast in mind.

The ASUS Transformer Pad Infinity Series is the world's full HD tablet with a 600 nits, Super IPS+ Display panel. Specifically designed for HD video enthusiasts, it boasts a 1920 x 1200 Full HD Super IPS+ 178° wide view display rated at 600 nits and ASUS SonicMaster sound technology to give users cinematic audio-visuals in a mobile package. Additionally, next generation Corning® Gorilla® Glass 2 helps protect the screen with improved damage resistance and toughness for a worry-free, on the go device.

The Transformer Pad Infinity has a 2MP front camera for video conferencing along with an 8MP rear camera with a large F2.2 aperture, 5-element lens and LED flash to ensure quality images even in the dark. And like the Transformer Pad Prime, it carries over the Zen design philosophy — coming in at an ultra-slim 8.5mm and sporting a metallic spun concentric circle finish.

### Full High Definition Screen

The ASUS Transformer Pad infinity series sports the highest resolution ever on a Android device. With a 1920 x 1200 resolution on a 10.1" Transformer Pad, the resolution is even higher than your television. With the higher resolution, the ASUS Transformer Pad Infinity series brings to you 1.5 times more RGB pixels in the same area, meaning you will get to view a more vibrant, sharper and accurate image. The games will never be pixelated again!

### Best In-Class Camera

The ASUS Transformer Pad comes with 8Mega Pixel auto-focus rear camera with back-illuminated CMOS sensor that helps improves image clarity, making it viewable in low light environment. The ASUS Transformer Pad Infinity series also comes with larger F/2.2 aperture, 5 element lens and hybrid IR filter that captures more light during photo-taking to provide a brighter and clearer image quality with more accurate color.

**10.1" TF700T-64**

# ASUS 2 Years Global Warranty

ASUS offers consumers 2 years global warranty on notebooks

ASUS guarantees you with no repair and component charges within your 2 years warranty period. And the next best thing: ASUS's international warranty makes sure that you are protected even if you are stationed abroad, with our centers established across 55 countries.

This is ASUS's commitment to deliver quality and customer satisfaction to you, wherever you might be.
